## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 30 December 2008 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 39-57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 39 recites a method for diagnosing and repairing network devices on a network, comprising a network management system. Since a network management system is not a step to be performed, but rather a product, the metes and bounds of the claim are left unclear. Similarly, claim 57 recites a computer-readable volatile or non-volatile storage medium storing one or more sequences of instructions for managing a plurality of network devices on a network, which instructions, when executed by one or

more processors, cause the one or more processors to a network management system. Further, each of the following recited steps involve performance by the network management system. It is unclear how the network management system is connected to the claimed computer-readable storage medium. Thus, in both claims 39 and 57, the metes and bounds are not distinctly defined, which is a violation of 35 U.S.C. 112, second paragraph.

***Allowable Subject Matter***

4. Claim 58 is allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

The elements of independent claim 58 were not found through a search of the prior art, nor were they considered obvious by the examiner. In particular, the prior art of record does not teach or suggest, in combination with the remaining limitations, "the network management system, automatically, without user intervention, detecting modifications to the network and automatically, without user intervention, modifying the selected queries to match the modifications."

6. Claims 39-57 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See Form PTO-892.
